Subject: RE: SSO fix — test results

Hi Nadia,

Thanks for the test build on Monday. Our IT team tested single sign-on with 10 multi-role users yesterday: 9 signed in correctly, 1 still got "role mapping failed" (a user with three roles, one of which is inactive). Logs attached in the ticket.

So nearly there. If the three-role case is fixed we are happy for you to count Holloway as signed off.

Regards, Kwame
